

Daily Timetable – Monday 22nd February 2021

Please find below some optional activity ideas that children can complete on the schools Inset day if they would like to. On the following page is a list of useful websites for children to explore. Any resources for the activities are available on the pages following the list of websites.

Beam an animal into your home

Thanks to Google's augmented-reality search feature, you can beam a virtual tiger, shark or pug into your home. Just download Google Chrome to your phone, then search for an animal. Click the 'view in 3D button', then 'view in your space' and you should see the creature prowling your room on your device's screen.

It doesn't work for every single animal, but some other fun ones include penguin, hedgehog and lion. To access this feature, your device will need to be AR (augmented reality) enabled, so this might not work on some older phones. The easiest way to find out is to try it.

Related tasks

Research the animal you have beamed into your home and create a fact file.

Draw a picture of your animal – YouTube “how to draw a...”

Write a short story about your animal.

Create a home for your animal.

Screen Time Warning

While some tasks involve a device with a screen such as an iPad, computer, laptop, tablet, phone or TV, not all tasks will require such a device.

It is important that children do not spend too much time in front of a screen (learning or having some down time) and are enjoying other activities such as colouring, drawing, playing with toys, being active, reading and interacting with those at home.

Thank you.
