Maths Number

Complete page 43 of your activity booklet. Prove it!

$345 \times 10 = 3450$ $68.3 \times 10 = 683$

Draw it	<div style="border: 1px solid black; padding: 5px; text-align: center;"> ? <div style="display: flex; justify-content: space-around; border-top: 1px solid black; border-bottom: 1px solid black;"> 12121212121212121212 </div> </div>																													
Explain it	<p>When multiplying by 10, we focus on place value. Multiplying any number, increases the number. In this case, we increase it 10 times. When multiplying, we must move the digits to the left. When needed, we then add a 0 place holder. In decimals, it's not always needed.</p>																													
Make a mistake	<p>$12 \times 10 = 102$ When multiplying by 10 and crossing the 100 barrier, sometimes we mistake where the 0 should go.</p> <p>$12.3 \times 10 = 120.3$ When multiplying decimals by 10, sometimes you forget that we don't just add a 0 as place holder, but we need to move the digits by using our place value knowledge.</p>																													
Tell a maths story	<p>Mrs A buys 10 packs of purple pens. Each pack has 12 pens. How many pens does she have altogether?</p>
